SPIE

Curriculum/Instructional Strategies. The curriculum will be for Spanish 3 students. I will be using Power Point as a presentation of the Seneca game. In addition to the power point presentation there is also a score sheet for each team of 5 students. This will be a group making, strategy and problem solving game that will be designed, tested, evaluated and redesigned for future classes.

Objectives.

SWBAT use Spanish vocabulary that is used in the Agriculture Industry.

SWBAT understand the basics of bringing fruit from the field to the market.

SWBAT use real time data to problems in a collaborative group

Activities. The activity will be a simulation game that would be played over a 2 hr block. The first part will be a vocabulary introduction. The second will be a simulation. The third will be a oral reflection of the team results. The last will be a personal written reflection from each student.

Assessment. A pre and post survey will be given on the Spanish Vocabulary of the Agriculture Industry. The guided reflection will be about the 2nd and 3rd objective.

Products. The PPT simulation and the word chart for each team's score card.
